

A GUIDE TO THE SIRIUS Multicharger

2 CHARGING FUNCTIONS

Please note: For correct use of the 3 stations charger, use a 5V/2A adapter.

For correct use of the 7 stations charger, use a 5V/3A adapter.

There are 2 categories of light when charging your product – see illustration below:

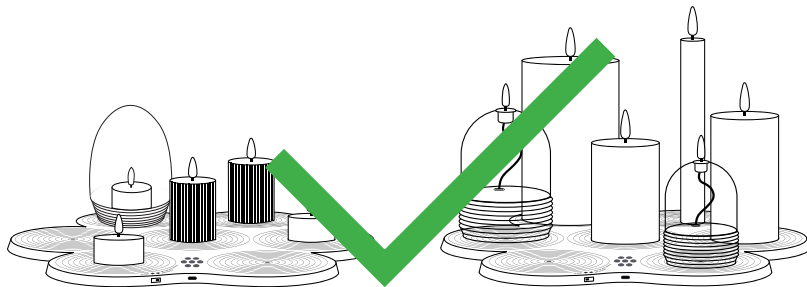

It is important to choose the correct function on the charger according to your rechargeable product:

IMPORTANT!

DO NOT combine the 2 categories of lights on the multicharger at the same time, as this could damage the product.

Please see manual for further instructions.
